## MECHANICAL VIBRATIONS + LAB

Course code : MEE71

Credits: 5

L:P:T:S : 3:2:0:0

CIE marks: 50+25

Exam hours : 3 hours

SEE marks: 50+25

**Course outcomes: At the end of the course the students will be able to**

<b>MEE71.1</b>	<b>Understand</b> the basic concepts of vibrations and its causes.
<b>MEE71.2</b>	<b>Remember</b> the methods of solving the wave forms using the Fourier series.
<b>MEE71.3</b>	<b>Evaluate</b> the methods to determine the natural frequencies.
<b>MEE71.4</b>	<b>Analyze</b> the forced vibrations of systems and measuring instruments.
<b>MEE71.5</b>	<b>Apply</b> and <b>evaluate</b> the methods to determine the natural frequencies of multi degree freedom systems.
<b>MEE71.6</b>	<b>Evaluate</b> continuous systems and <b>Remember</b> the monitoring techniques.

### Mapping of the course outcome to program outcomes

<b>MEE71.6</b>	3	3	3	2	3	3	3	3	2	3	2	2

Module no.	Module content	Hrs	COs
1	<b>Introduction to vibrations:</b> Basic concepts and definitions. Simple harmonic motions, addition by analytical and graphical methods. Super position of waves. Beats. Representation of wave forms using Fourier series and work done by a wave (derivations and problems)	8	<b>MEE71.1</b> <b>MEE71.2</b>
	<b>List of experiments:</b> 1) <b>Natural frequency of simple pendulum by experiment and MATLAB software.</b> 2) <b>Natural frequency of compound pendulum by experiment and MATLAB software.</b>		
2	<b>Free Vibrations:</b> Differential equation for aundamped spring mass system using Newton's, Energy and rayleigh's methods. Natural frequency of simple and compound pendulum, and spring mass system considering the mass of the spring. Determination of natural frequencies of pendulum systems and disc-suspended mass spring systems by newtons method. Types of damping systems, Differential equation for damped spring mass system with solution for under damped, critically damped and over damped systems. Log decrement. Problems on damped systems.	10	<b>MEE71.1</b> <b>MEE71.2</b>

	<b>List of experiments:</b> <b>3) Natural frequency of spring mass system by experiment and MATLAB software.</b> <b>4) Natural frequency of torsional system by experiment and MATLAB software.</b>		
3	<b>Forced vibrations:</b> Excitation sources, equation of motion for a forced spring mass damper system, rotating and reciprocating unbalanced system response. Absolute and relative motion. Vibrations isolations and transmissibility. Problems on forced vibrations. <b>Vibrations measuring instruments:</b> Vibrometer and accelerometer. Whirling of shafts with and without air damping. Critical speed of a shaft. Problems on a vibrometer and accelerometer. Problems on critical speed of shaft.	9	MEE71.2 MEE71.4
	<b>List of experiments:</b> <b>5) Determination of natural frequency for rigid body-spring system by experiment and MATLAB software.</b>		
4	<b>Multi degree freedom systems:</b> Introduction, influence coefficients, Maxwell's reciprocal theorem, Determination of natural frequency using Rayleigh's method, Dunkerley's method, Holzer's method, Stodola method and Matrix iteration method.(spring mass systems and torsional systems)	9	MEE71.3 MEE71.4
	<b>List of experiments:</b> <b>6) Whirling of shafts and critical speed by experiment and MATLAB software.</b>		
5	<b>Continuous systems:</b> Introduction to continuous systems, vibrations of a string, longitudinal vibrations of rods, torsional vibrations of rods, Euler's equation of beams. Problems. <b>Signal conditioning and monitoring techniques:</b> Signal analysis and spectrum analyzers, band pass filter, dynamic testing of machines and structures, experimental modal analysis, machine condition monitoring techniques and diagnosis.	8	MEE71.5
	<b>List of experiments:</b> <b>1) Determination of natural frequency and mode shapes of longitudinal vibrations of rod.</b> <b>2) Determination of natural frequency and mode shapes of torsional vibrations of rods.</b>

## CONTROL ENGINEERING + LAB

Course Code : MEE72

Credits : 05

L: P: T: S : 3:2:0:0

CIE Marks : 50 + 25

Exam Hours : 03 + 03

SEE Marks : 50 + 25

**Course Outcomes: At the end of the Course, the student will be able to:**

<b>MEE72.1</b>	<b>Apply</b> various control systems concepts to mechanical models and identify the similarities
<b>MEE72.2</b>	<b>Analyze</b> the transient and steady state response of mechanical control systems
<b>MEE72.3</b>	<b>Evaluate</b> transfer function of control systems using Block diagram reduction technique and Mason's gain formula
<b>MEE72.4</b>	<b>Remember</b> and Appraise the stability of the control systems using graphical methods and recommend improvements
<b>MEE72.5</b>	<b>Demonstrate</b> frequency response for studying characteristics of plots
<b>MEE72.6</b>	<b>Analyze</b> and solve the problem using MAT Lab programming.

**Mapping of the course outcome to program outcomes**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>MEE72.1</b>	3	3	3	3	2	1	1	1	1	1	2	1

1	<p><b>Introduction:</b> Objectives of research, limitations in research, qualities of good research worker, criteria of good research, limitations of research.</p> <p><b>Types of research and approaches:</b> fundamental, pure or theoretical research, applied research, descriptive research, evaluation research, experimental research, historical research.</p> <p><b>Literature review:</b> Purpose of review of literature, literature research procedure, sources of literature, importance of review of literature.</p>	9	MEE733.1 MEE733.2
2	<p><b>Research Design:</b> Concept and Importance in Research – Features of a good research design, Exploratory Research Design, concept, types and uses, Descriptive Research Designs, concept, types and uses. Experimental Design: Concept of Independent &amp; Dependent variables.</p> <p><b>Qualitative and Quantitative Research:</b> Qualitative research, Quantitative research, Concept of measurement, causality, generalization, and replication. Merging the two approaches.</p>	8	MEE733.3

3	<b>Sampling:</b> Concepts of Statistical Population, Sample, Sampling Frame, Sampling Error, Sample Size, Non Response. Characteristics of a good sample. Probability Sample – Simple Random Sample, Systematic Sample, Stratified Random Sample & Multi-stage sampling. Determining size of the sample – Practical considerations in sampling and sample size.	9	<b>MEE733.4</b>
4	<b>Data Analysis:</b> Data Preparation – Univariate analysis (frequency tables, bar charts, pie charts, percentages), Bivariate analysis – Cross tabulations and Chi-square test including testing hypothesis of association.	9	<b>MEE733.4 MEE733.5</b>
5	Interpretation of Data and paper Writing – layout of a research paper, Journals in Computer Science, Impact factor of Journals, When and Where to publish, Ethical issues related to publishing, plagiarism and Self-Plagiarism References: Encyclopedias, Research Guides, Handbook etc.	9	<b>MEE733.5 MEE733.6</b>

## ORGANIZATIONAL BEHAVIOUR AND PROFESSIONAL ETHICS

Course Code : MEE734  
 L: P:T: S : 3:0:0:1  
 Exams Hours : 03

Credits: 03  
 CIE Mark:50  
 SEE Marks: 50

**COURSE OUTCOMES: At the end of the course, the students will be able to:**

<b>MEE734.1</b>	<b>Understand</b> the importance of organizational behavior, behavior models, personality types, emotions, attitudes and motivation.
<b>MEE734.2</b>	<b>Remember</b> the importance of group behaviour and apply the principles for team building.
<b>MEE734.3</b>	<b>Apply</b> the concept of leadership, the power of managers and apply for stress management and balancing life and work.
<b>MEE734.4</b>	<b>Analyze</b> the human values and practice of ethics in the workplace and apply engineering to social experimentation.
<b>MEE734.5</b>	<b>Apply</b> ethics in society, safety, discuss the ethical issues related to engineering
<b>MEE734.6</b>	<b>Analyze</b> the responsibilities and rights in the society and understand global issues.

**COURSE OUTCOMES: At the end of the course, the students will be able to:**

<b>MEE744.1</b>	<b>Understand</b> the functions of IC engine components and fuel supply systems.
<b>MEE744.2</b>	<b>Evaluate</b> the performance of the engine using super charger and turbo charger.
<b>MEE744.3</b>	<b>Remember</b> the different ignition systems used in IC engines .
<b>MEE744.4</b>	<b>Design</b> and Development of various transmission system, braking and safety mechanisms
<b>MEE744.5</b>	<b>Analyze</b> the concept of dual fuel engines , free piston engines and Automotive Emission Control System.
<b>MEE744.6</b>	<b>Apply</b> new emission standards through Modern Technology.

**Mapping of Course outcomes to Program outcomes:**

## DESIGN FOR MANUFACTURING & ASSEMBLY

Sub Code : MEE751

Credits 03

L: P: T: S : 3:0:0:0

CIE Marks 50

Exam Hours : 03

SEE Marks 50

**COURSE OUTCOMES:** at the end of the course, the students will be able to

MEE751.1	<b>Understand</b> the basic knowledge of tolerance analysis.
MEE751.2	<b>Describe</b> the group models & datum features.
MEE751.3	<b>Develop</b> the component design- machining consideration.
MEE751.4	<b>Analyze</b> different types of casting consideration.
MEE751.5	<b>Apply</b> design principles for gauges & economic costing.
MEE751.6	<b>Evaluate</b> the uneconomical design of casting and Modification of the design.

**Mapping of Course outcomes to Program outcomes:**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

Course syllabus			
Module No	Contents	Hrs	Cos
1	<p><b>Overview to Hydraulic Power:</b> Definition of hydraulic system, advantages, limitations, applications, Pascal's law, structure of hydraulic control system, problems on Pascal's law.</p> <p><b>The source of Hydraulic Power:</b> Pumps Classification of pumps, pumping theory of positive displacement pumps, construction and working of Gear pumps, Vane pumps, Piston pumps, fixed and variable displacement pumps, combination pumps, Pump performance characteristics, pump Selection factors, problems on pumps.</p>	9	MEE754.1

2	<p><b>Hydraulic Prime Movers:</b> Classification cylinder and hydraulic motors, Linear Hydraulic Actuators, single and double acting cylinder, Mechanics of Hydraulic Cylinder Loading, construction and working of rotary actuators such as gear, vane, piston motors, Hydraulic Motor Theoretical Torque, Power and Flow Rate, Hydraulic Motor Performance, problems, symbolic representation of hydraulic actuators/problems on cylinders, Installation and mounting of hydraulic cylinders</p>	8	MEE754.2
3	<p><b>Outline to Hydraulic &amp; Pneumatic Control: Control Components in Hydraulic Systems:</b> Classification of control valves, Directional Control Valves- Symbolic representation, constructional features of poppet, sliding spool, rotary type valves solenoid and pilot operated DCV, shuttle valve, check valves, Pressure control valves - types, direct operated types and pilot operated types. Flow Control Valves - compensated and non-compensated FCV, needle valve, temperature compensated, pressure compensated type Load control valves, Special purpose control valves – Exhaust Mufflers</p> <p><b>Pneumatic Control:</b> Types and construction, use of memory valve, Quick exhaust valve, time delay valve, twin pressure valve, symbols. Structure of Pneumatic Control System, fluid conditioners and FRL unit</p>	9	MEE754.3 MEE754.4
4	<p><b>Hydraulic Circuit Design And Analysis:</b> Control of Single and Double - Acting Hydraulic Cylinder, Regenerative circuit, Pump Unloading Circuit, Double Pump Hydraulic System, Counter balance Valve Application, Hydraulic Cylinder Sequencing Circuits, Automatic cylinder reciprocating system, Locked Cylinder using Pilot check Valve, Cylinder synchronizing circuit using different methods, factors affecting synchronization, Hydraulic circuit for force multiplication, Speed Control of Hydraulic Cylinder, Speed Control of Hydraulic Motors-Bleed-off control, Safety circuit, Accumulators, types, construction.</p>	9	MEE754.4 MEE754.5
5	<p><b>Maintenance of Hydraulic System:</b> Hydraulic Oils - Desirable properties, general type of Fluids, Seals &amp; Sealing Devices, Reservoir System, Filters and Strainers, wear of Moving Parts due to solid -particle Contamination, temperature control (heat exchangers), Pressure switches, trouble shooting. Maintenance and performance monitoring of hydraulic systems.</p> <p><b>Pneumatic Actuators:</b> Linear cylinder - Types, Conventional type of cylinder- working, End position cushioning, mounting arrangements- Applications. Rod - Less cylinder's types,</p>	9	MEE754.6

## RAPID PROTOTYPING

Course Code : MEE755

L: P: T: S : 3:0:0:0

Exams Hours : 03

Credits: 03

CIE Marks: 50

SEE Marks: 50

### COURSE OUTCOMES: at the end of the course, the students will be able to:

MEE755.1	<b>Remember</b> the 3D modeling knowledge for the creation of solid models by the modeling softwares. And to convert into .stl format.
MEE755.2	<b>Understand</b> the principles for additive manufacturing techniques.
MEE755.3	<b>Apply</b> the material science knowledge for new composite raw materials.
MEE755.4	<b>Analyze</b> the nature and behavior of the printed parts to investigate the defects.
MEE755.5	<b>Create</b> the 3D models with the knowledge of additive manufacturing and their limitations.
MEE755.6	<b>Evaluate</b> the performance of the printed parts subjected to actual conditions.

### Mapping of Course outcomes to Program outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
MEE755.1	3	2	2	2	3	1	1	1	2	1	2	2
MEE755.2	3	2	3	3	3	1	1	1	2	1	2	2
MEE755.3	3	2	2	2	3	1	1	1	2	1	2	2
MEE755.4	3	2	2	2	3	1	1	1	2	1	2	2

## COMPUTATIONAL FLUIDDYNAMICS

SubCode :MEE812

Credits: 03

L: P:T: S : 3:0:0:0

CIEMarks: 50

ExamHours :03

SEE Marks: 50

**Course Outcomes: At the end of the Course, the Student will be able to do the following:**

<b>MEE812.1</b>	Understand in-depth introduction to the methods and analysis techniques used in computational solutions of fluid mechanics and heat transfer problems.
<b>MEE812.2</b>	Demonstrate experience in the application of CFD analysis to real Engineering designs.
<b>MEE812.3</b>	Apply the knowledge to Model problems and to study the interaction of physical processes and numerical techniques.
<b>MEE812.4</b>	Analyze Contemporary methods for boundary layers, incompressible viscous flows, and inviscid compressible flows are studied.
<b>MEE812.5</b>	Design problems using proper turbulence models
<b>MEE812.6</b>	Solve practical problems related to engineering

**-Mapping of Course Outcomes to Program Outcomes:**

### SYLLABUS

Module No	Contents of the Module	Hou rs	COs
1	<b>Introduction To CFD:</b> CFD ideas to understand, CFD Application, Governing Equations (no derivation) of flow; continuity, momentum, energy. Conservative & Non- conservative forms of equations, Integral vs. Differential Forms of Equations. Form of Equations particularly suitable for CFD work. Shock capturing, Shock fitting, Physical Boundaryconditions.	9	<b>MEE81 2.1</b>

2	<b>Mathematical Behavior of Partial Differential Equations and Discretization:</b> Classification of partial differential equations and its Impact on computational fluid dynamics, Essence of discretization, order of accuracy, consistency of numerical schemes, Lax's Theorem, convergence, Reflection Boundary condition, case studies on PDE	9	MEE81 2.2
3	Mathematical Behavior of Partial Differential Equations and Discretization: Higher order Difference quotients. Explicit & Implicit Schemes, Error and analysis of stability, Error Propagation, Stability properties of Explicit & Implicit schemes. Solution Methods of Finite Difference Equations: Time & Space Marching, Alternating Direction Implicit (ADI) Schemes. Relaxation scheme, Jacobi and Gauss-Seidel techniques, Lax-Wendroff first order scheme, Lax-Wendroff with artificial viscosity	9	MEE81 2.3
4	<b>Grid Generation:</b> Structured Grid Generation: Algebraic Methods, PDE mapping methods, use of grid control functions, Surface grid generation, Multi Block Structured grid generation, overlapping and Chimera grids. Unstructured Grid Generation: Delaunay-Voronoi Method, advancing front methods (AFM Modified for Quadrilaterals, iterative paving method, Quadtree & Octree method). <b>Adaptive Grid Methods:</b> Multi Block Adaptive Structured Grid Generation, Unstructured adaptive Methods. Mesh refinement methods, and Mesh enrichment method.	9	MEE81 2.4  MEE81 2.6
5	<b>Finite Volume Techniques:</b> Finite volume Discretisation-Cell Centered Formulation, High resolution finite volume upwind scheme Runge-Kutta stepping, Multi-Step Integration scheme. Cell vertex Formulation. <b>Application to Turbulence-Models,</b> Large eddy simulation, Direct Numerical Solution, Post-processing and visualization, Journal based on application to turbulence, ANSYS flow analysis report on symmetric and cambered airfoil.	8	MEE81 2.5  MEE81 2.6

## NON-DESTRUCTIVE TESTING

Course Code : MEE814

Credits: 03

L: P: T: S : 3:0:0:0

CIE Marks: 25

Exams Hours : 03

SEE Marks: 50

**COURSE OUTCOMES: At the end of the course, the students will be able to:**

<b>MEE814.1</b>	Remember the basic methods of non-destructive testing
<b>MEE814.2</b>	Understand the homogeneity in materials
<b>MEE814.3</b>	Analyze and Compare materials quality
<b>MEE814.4</b>	Evaluate cracks, voids and other imperfections
<b>MEE814.5</b>	Analyze and Monitor the changes with passage of time
<b>MEE814.6</b>	Apply the process and extend to industrial usages.

**Mapping of Course outcomes to Program outcomes:**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>MEE814.1</b>	3	2	2	2	3	2	1	1	1	1	1	1
<b>MEE814.2</b>	3	3	2	3	3	3	2	1	1	1	1	2
<b>MEE814.3</b>	3	3	3	3	3	3	2	1	1	1	1	2
<b>MEE814.4</b>	2	3	2	3	3	3	2	1	1	1	1	2
<b>MEE814.5</b>	2	3	2	3	3	3	2	1	1	1	1	2
<b>MEE814.6</b>	3	3	2	3	3	3	2	1	1	1	1	2

Module No	Contents of Module	Hrs	Cos
1	<b>Introduction to Non destructive Testing:</b> Introduction, defects in manufacturing process, comparison of destructive and non destructive test, advantages and limitations, Non destructive evaluation: selection of ND methods, flaw detection and evaluation, types of flaws, types of leaks, methods of leak testing, techniques, visual inspection, replication microscopy techniques for Non destructive Evaluation: specimen preparation, replication techniques, micro structural analysis.	8	<b>MEE814.1</b> <b>MEE814.2</b> <b>MEE814.3</b> <b>MEE814.4</b> <b>MEE814.5</b> <b>MEE814.6</b>
2	<b>Liquid penetration inspection:</b> physical principles penetrate methods, procedure for penetrate testing, penetrates, properties of penetrates, developer and its selection, its advantages and limitation. <b>Magnetic Particle Inspection:</b> principle, procedures, Methods of generating magnetic field, characteristics of magnetic particles, types of magnetic particles and suspension liquids steps in inspection application, advantages and limitations	9	<b>MEE814.2</b> <b>MEE814.3</b> <b>MEE814.4</b> <b>MEE814.6</b>
3	<b>Radiography Inspection:</b> principles, methods of inspection, uses of radiography, radiation source X-rays and gamma rays, X-ray-tube, radio graphic films, neutron radiography, Thermal inspection principles, equipment inspection methods applications. <b>Computed tomography:</b> introduction, principles, equipment capabilities, detection, application.	9	<b>MEE814.2</b> <b>MEE814.3</b> <b>MEE814.4</b> <b>MEE814.6</b>

4	<p><b>Thermal inspection:</b> introduction, principles, heat transfer mechanisms, characteristics, thermal inspection, inspection method, application</p> <p><b>Optical Holography:</b> introduction, principles, Basics of Holography, recording and reconstruction - Acoustical Holography: systems and techniques applications.</p>	9	<p><b>MEE814.2</b>  <b>MEE814.3</b>  <b>MEE814.4</b>  <b>MEE814.6</b></p>
5	<p><b>Eddy Current Inspection:</b> introduction, principles, operation variables, procedure, functions of eddy current system, inspection coils, and detectable discounts by the method. Eddy current instruments, read out instruments, Microwave Inspection: Microwave holography, applications and limitations</p> <p><b>Ultrasonic Inspection:</b> Basic equipment characteristics of ultrasonic waves, variables inspection, inspection methods pulse echo A,B,C scans transmission, resonance techniques, transducer elements couplets, search units, contact types and immersion types inspection standards-standard reference blocks.</p>	9	<p><b>MEE814.2</b>  <b>MEE814.3</b>  <b>MEE814.4</b>  <b>MEE814.6</b></p>

## APPENDIX- A

### Outcome Based Education

**Outcome-based education (OBE)** is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience each student should have achieved the goal. There is no specified style of teaching or assessment in OBE; instead classes, opportunities, and assessments should all help students achieve the specified outcomes.

There are three educational Outcomes as defined by the National Board of Accreditation:

**Program Educational Objectives:** The Educational objectives of an engineering degree program are the statements that describe the expected achievements of graduate in their career and also in particular what the graduates are expected to perform and achieve during the first few years after graduation. [nbaindia.org]

**Program Outcomes:** What the student would demonstrate upon graduation. Graduate attributes are separately listed in Appendix C

**Course Outcome:** The specific outcome/s of each course/subject that is a part of the program curriculum. Each subject/course is expected to have a set of Course Outcomes

### Mapping of Outcomes

## APPENDIX- B

### The Graduate Attributes of NBA

- **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **Problem analysis:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **Conduct investigations of complex problems:** The problems that cannot be solved by straightforward application of knowledge, theories and techniques applicable to the engineering discipline that may not have a unique solution. For example, a

design problem can be solved in many ways and lead to multiple possible solutions that require consideration of appropriate constraints/requirements not explicitly given in the problem statement (like: cost, power requirement, durability, product life, etc.) which need to be defined (modeled) within appropriate mathematical framework that often require use of modern computational concepts and tools.

- **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**APPENDIX-C**  
**BLOOM'S TAXONOMY**

**Bloom's taxonomy** is a classification system used to define and distinguish different levels of human cognition—i.e., thinking, learning, and understanding. Educators have typically used Bloom's taxonomy to inform or guide the development of assessments (tests and other evaluations of student learning), curriculum (units, lessons, projects, and other learning activities), and instructional methods such as questioning strategies.
