

## Expert Talk

# SAP Signavio

## Business Process Management

24 January 2026

10:00 AM - 12:00 PM

8<sup>th</sup> Semester Students

SAP Lab,  
Sardar Vallabhbhai Patel Block

### Faculty Coordinator

**Prof. Mohan Kumar G R**

Assistant Professor - ME

### Convenor

**Dr. D.V. Sreekanth**

HoD - ME

**Dr. Manjunatha**

Principal

Organised by

SAP Centre of Excellence

Department of Mechanical Engineering

**Prof. Rakesh C**

Associate Head  
Student Affairs

# **Expert Talk Report on SAP Signavio-Business Process Management**

**Date and Time:** 24<sup>th</sup> January 2026, 10:00 AM-12:00 PM

**Topic:** SAP Signavio-Business Process Management

**Resource Person:** Prof. Rakesh C, Associate Head – Student Affairs, NHCE

**Convenor:** Dr. D.V. Sreekanth, HoD-ME,NHCE

Dr.Manjunatha,Principal,NHCE

**Faculty Coordinators:** Prof. Mohan kumar G R, Assistant Professor

**Audience:** 8<sup>th</sup> Semester Mechanical students

**Venue:** SAP Lab, NHCE

## **Introduction**

An Expert Talk on “SAP Signavio – Business Process Management” was successfully conducted for the 8th Semester students of the Department of Mechanical Engineering at New Horizon College of Engineering. The session was organized by the SAP Centre of Excellence in association with the Department of Mechanical Engineering.

## **About SAP Signavio**

SAP Signavio is a cloud-based Business Process Management (BPM) and Process Transformation platform that enables organizations to understand, analyze, improve, and transform their end-to-end business processes efficiently. It provides a comprehensive suite of tools that support the complete process lifecycle, from process discovery and modeling to analysis, automation, and governance.

SAP Signavio helps organizations gain process transparency by visualizing how business operations are actually executed across departments and systems. By using standardized modeling notations such as BPMN 2.0, users can clearly define activities, responsibilities, decision points, and information flows within a process. The SAP Signavio Process Transformation Suite includes key components such as Process Manager for process modeling and documentation

## **Objectives of the Expert Talk**

The primary objective of the expert talk was to introduce students to SAP Signavio, a cloud based Business Process Management (BPM) platform, and to help them understand how organizations analyze, model, optimize, and transform business processes using SAP Signavio tools.

## **Session Highlights**

During the session, students were introduced to the SAP Signavio Process Transformation Suite, which enables organizations to discover, model, analyze, and improve their end-to-end business processes. The expert explained the importance of Business Process Management (BPM) in today's digital enterprises and highlighted how SAP Signavio supports process modeling, process mining, simulation, and governance.

Students were exposed to key components of SAP Signavio such as Process Manager, Journey Modeler, Process Insights, Process Intelligence, Process Governance, and SAP Build Process Automation. Special emphasis was given to BPMN 2.0 process modeling, including tasks, events, gateways, pools, lanes, and process flows.

## **Hands-on Learning and Demonstration**

The expert demonstrated the SAP Signavio Academic Edition and explained how students can register and access the platform using their academic credentials. The session included an overview of Quick Model and Graphical Editor tools used for creating BPMN diagrams.

Real-time case studies and practical examples were discussed to help students understand how SAP Signavio is used in ERP transformations, particularly in SAP S/4HANA implementations. The importance of process transparency, collaboration, and data-driven decision-making was emphasized.

## **Student Interaction and Outcomes**

The session was highly interactive, with students actively participating in discussions, asking questions, and analyzing process improvement scenarios. The expert highlighted career opportunities in BPM roles such as Business Analyst, Process Consultant, Process Architect, and Solution Architect.

By the end of the session, students gained a clear understanding of SAP Signavio, its relevance in industry, and its growing demand in the global job market.

## Conclusion

The Expert Talk on SAP Signavio was highly informative and beneficial for students. It enhanced their awareness of modern BPM tools and industry practices, bridging the gap between academic learning and real-world enterprise applications.

## A Glimpse of the Expert Talk
